Data Analyst

7542980819

Bangaluru, KR

Profile Summary

Data Analyst with **3+** years of experience in **SQL, Python (Pandas), Excel, and Power BI**, specializing in data analysis, reporting automation, dashboard development, and business intelligence. Skilled in analysing large datasets, optimizing SQL queries, building **ETL workflows**, and generating actionable insights to support data-driven decision-making. Experienced in cross-functional collaboration, KPI tracking, and transforming raw data into meaningful business solutions.

Technical Skills

- **Programming:** Python (Pandas)
- **Databases & Querying:** SQL, Hive, MySQL
- **Visualization Tools:** Power BI, Excel
- **Workflow & ETL Tools:** Apache Airflow
- **Generative AI & LLMs:** Claude Code, Ollama, Prompt Engineering, AI Agents, RAG
- **Core Skills:** Data Analysis, Data Cleaning, ETL, Query Optimization, Reporting Automation, Dashboard Development, Business Intelligence

Generative AI & AI Agent Development

Tech: Python, Claude Code, LLMs, SQL, Pandas

Built AI-powered agents and data analysis assistants using Claude Code, Ollama, and open-source LLMs.

Automated SQL generation, data analysis, reporting, and workflow tasks using Generative AI and prompt engineering.

Deployed and evaluated LLMs such as Minimax-M3 and Gemma, optimizing performance for business and analytical use cases.

Explored RAG, tool integration, memory management, and AI workflow automation to enhance productivity and decision-making.

Work Experience

Data Analyst

TELUS International – Bengaluru, KA

Feb 2023 – Feb 2026

- Wrote and optimized complex SQL queries and used Python (Pandas) to extract, clean, and analyse datasets containing 1M+ records from multiple sources for business insights.
- Designed and maintained interactive dashboards and automated reports using Excel and Power BI, improving KPI tracking efficiency by 35%.
- Automated recurring reporting and data processing tasks using Python (Pandas), SQL, and advanced Excel functions, reducing manual effort by 40% and improving turnaround time.
- Analyzed operational datasets using SQL, Pandas, and Excel to identify trends, bottlenecks, and process gaps, helping improve business efficiency by 25%.
- Collaborated with Operations, Product, Tech, and CX teams to support data-driven decision-making and improve SLA adherence and service performance metrics.
- Ensured data accuracy and reporting reliability through validation checks and structured workflows, reducing reporting errors by 30%.

Business Analyst

Valeo – Chennai, TN

Mar 2022 – Dec 2022

- Developed SQL queries for client reporting, reducing **manual data preparation time by 30%**.

- Created **stored procedures and views** to automate recurring analysis tasks and improve team productivity.
 - Analyzed **user engagement data** to understand customer interaction patterns across mobile and tablet applications.
 - Supported data reporting initiatives to improve **visibility into product usage and performance metrics**.
-

Projects

Power BI Superstore Dashboard

Tech: Power BI, Excel, SQL

- Created an interactive business dashboard for sales and profit analysis.
- Designed KPIs, filters, and visual reports for category and regional insights.
- Improved business decision-making through data visualization.

SQL Sales & Business Analysis Project

Tech: SQL, MySQL, Excel

- Performed sales and profit analysis using complex SQL queries on large retail datasets.
- Used JOINS, GROUP BY, CTEs, Window Functions, and Subqueries for business insights.
- Generated reports for top-performing products, customer trends, and regional sales analysis.

SQL Customer & Order Analysis

Tech: SQL, MySQL Workbench, Sakila Database

- Analysed customer behaviour, rental trends, and revenue patterns using the Sakila database.
- Wrote advanced queries using INNER JOIN, LEFT JOIN, RANK(), DENSE_RANK(), and aggregate functions.
- Improved analytical problem-solving skills through real-world business scenarios.

IPL Sports Data Analysis Using SQL

Tech: SQL, Excel

- Analysed IPL cricket datasets to identify player performance and team statistics.
- Created SQL queries for season comparison, top scorers, and match-winning analysis.
- Built insights dashboards using exported SQL results.

Hobbies & Interests:

- AI Agent Development
- Generative AI & LLM Applications
- Prompt Engineering
- SQL Query Optimization
- Data Visualization
- Python Automation
- Business Intelligence
- AI-Powered Problem Solving

Certifications

- Python certification Hacker Rank
- NPTEL:- Python for data Science

Education

B.E. Computer Science

Sathyabama University

CGPA: **7.48 / 10**

2018 – 2022
